Aims and Scope

Microbial Ecology is an international journal featuring articles of original research and mini-review articles on those areas of ecology involving microorganisms, including prokaryotes, eucaryotes, and viruses. The Editors invite submissions in the areas of:

- * significant advances in the microbiology of natural ecosystems

- * ecological studies in medical, dental, animal, and plant microbiology
- * molecular biology and genetics in microbial ecology
- * ecological studies in applied microbiology
- * current methodological developments
- * microbial processes associated with environmental pollution
